

Welcome to our practice!

We are looking forward to meeting with you at your upcoming appointment. Be assured that you and your family will receive the best possible care available. We will work hard to provide you with the answers you need and a treatment program that offers you relief.

Your initial appointment can last 2 to 2 ½ hours. It will consist of gathering in-depth medical and environmental information, performing a thorough examination, and conducting necessary tests, which often include a breathing analysis and allergy testing. In order to complete this testing, we ask that you be free of antihistamine medications for 72 hours prior to your visit. Please call us if you are unsure if any of your medications are an antihistamine, or for any reason at all.

We look forward to seeing you soon.

Sincerely,

William Smits, M.D.
James Parkerson, D.O.
Jill Ham, NP
Donna Doerffler, NP
Renee Holley, NP
Linda Toth, NP
